The Rise of A.I.

The Rubber Band Effect

“Everything powered by electricity will gain knowledge and awareness.”

What is A.I.?

Conversational A.I. (ChatGPT) & A.I. have become synonymous.

Also, let's clear a misconception: ChatGPT is **NOT** a better version of Google Search.

What is A.G.I.?

A.I. used to have separate fields

The ChatGPT A.I. Promise

A.I. will make us more efficient!

A.I. will let us speak any language!

A.I. will solve medical problems!

A.I. will solve impossible scientific challenges!

A.I. will make us write faster, better, clearer!

A.I. will make us code faster!

A.I. will solve climate change!

A.I. will make a lot of money!

Trust collapse
Automated fake religions
Automated loopholes in law
AlphaPersuade
Reality collapse
Exponential scams
Fake everything
Exponential blackmail
Biology automation
Automated lobbying

Persuasion

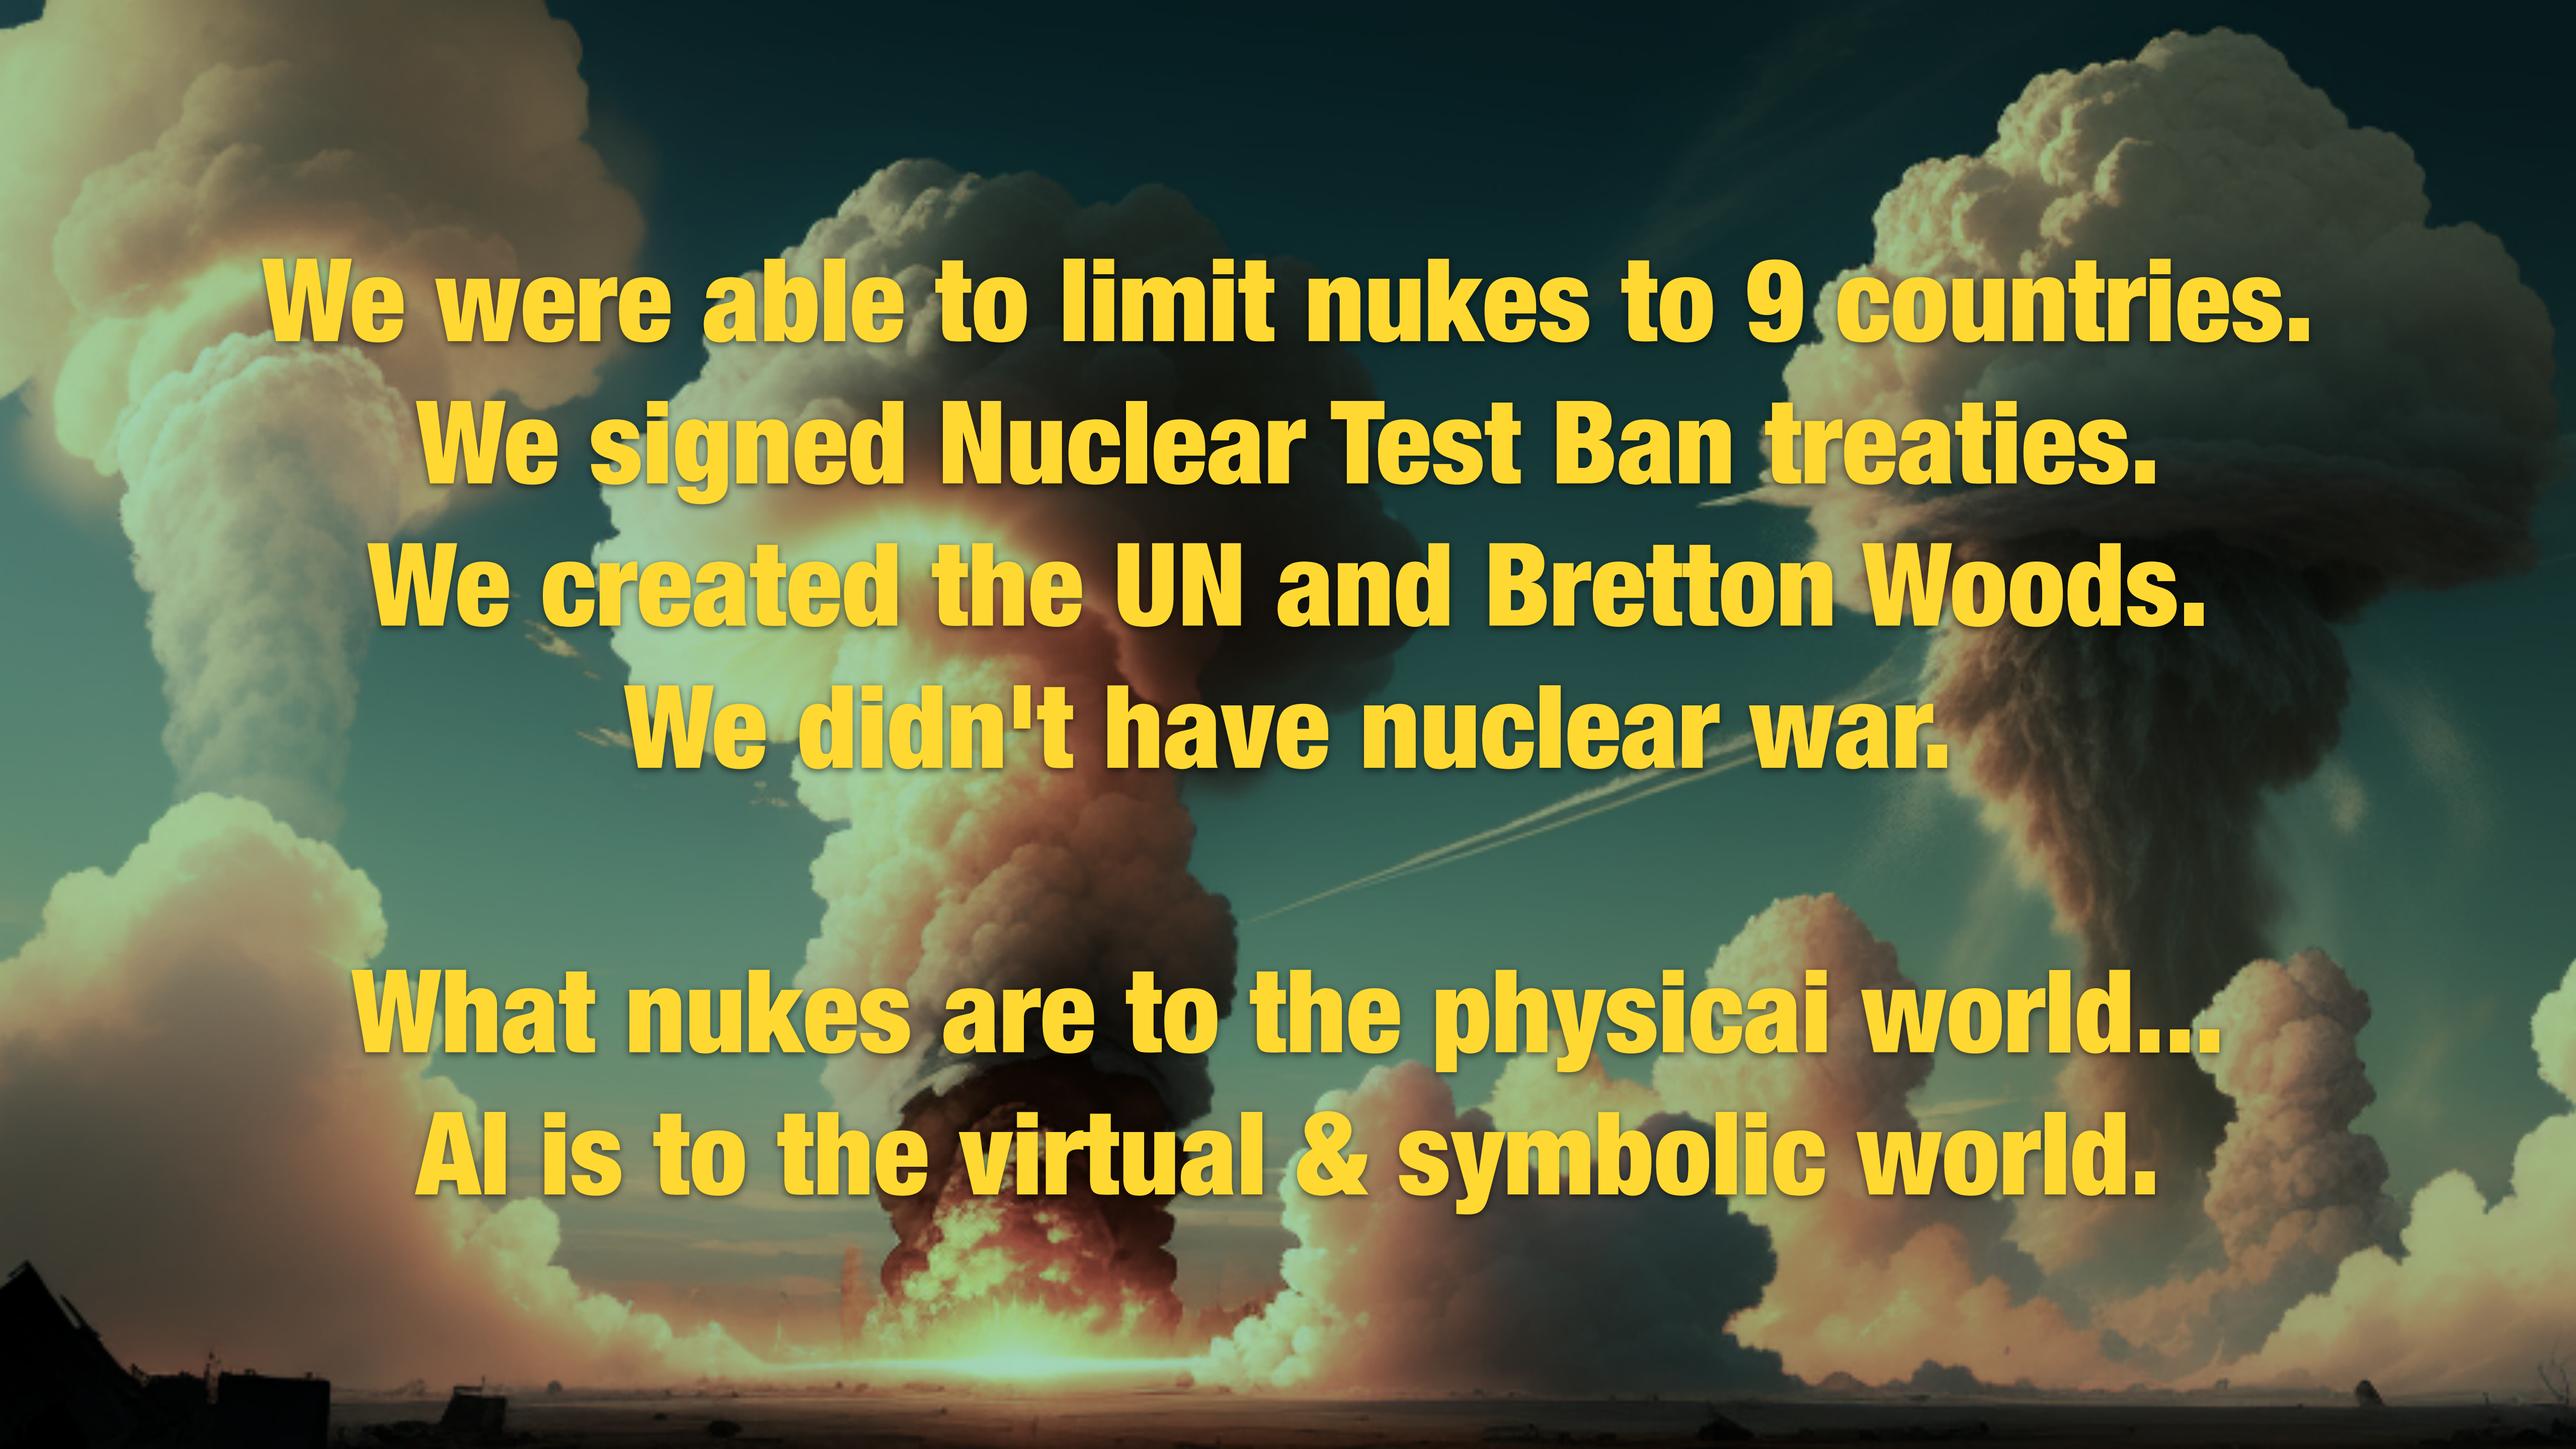
Alignment

Regardless of how you perceive it, you've got to do things AI can't do;

- Connect with people
- Think critically
- Focus conscious attention
- Think, then build new realities into existence

Translated into a Biblical View:

- True Biblical Fellowship
- Don't simply believe everything you see/hear
- Focus conscious attention on things that matter
- Be transformed by the renewing of your mind



We were able to limit nukes to 9 countries.
We signed Nuclear Test Ban treaties.
We created the UN and Bretton Woods.
We didn't have nuclear war.
What nukes are to the physicai world...
Al is to the virtual & symbolic world.
